PROFILE

I am a Front-End Developer with over 3 years of expertise in ReactJS development. My experience spans diverse industries, focusing on building responsive web applications and optimizing performance. I excel at translating user needs into practical and engaging solutions while staying updated with industry trends.

EDUCATION

2017 - 2020

SRI DEV SUMAN UNIVERSITY

- Bachelor of Computer Application

2020 - 2023

**UTTARAKHAND TECHNICAL
UNIVERSITY**

- Master of Computer Application

WORK EXPERIENCE

■ **Nov 2022 - Present**

Sachtech Solutions Pvt Ltd, Mohali
Associate Developer

Project Name:- Miracle Closet

Technology:- ReactJs, Firebase, Antd, Redux

Description:- Developed a dynamic e-commerce platform enabling users to browse, buy, and sell products across multiple categories. It integrates a unique feature requiring sellers to allocate a percentage of their product price as a charity contribution, promoting a socially responsible marketplace. Additionally, the chat feature offers a unique bargaining option, allowing users to request a lower price.

Project Name:- Galileo Tax Saving

Technology:- React.js, Firebase, Google Place APIs, Tailwind CSS, Tanstack Query

Description: A platform designed to provide tax-saving strategies and personalized advice tailored to America's tax regulations. It connects users with advisors and strategy providers, who recommend various approaches to maximize savings. The application integrates real-time data from Google Place APIs to enhance location-based tax planning. Leveraged Tanstack Query for optimized data fetching and state management

Project Name:- Print That

Technology:- ReactJs, Firebase, Canvas FabricJs, Antd, Redux Toolkit

SKILLS

- React Js
- Next Js
- Redux
- RTK Query
- Javascript
- Typescript
- Tanstack Query
- HTML
- CSS
- Bootstrap
- Tailwind CSS
- Firebase
- Jenkins pipeline
- GIT

LANGUAGES

- English
- Hindi

Web:- The application allows users to personalize and purchase products with a unique feature I developed using HTML5 Canvas and fabricJs. This functionality enables printing of images and adding text directly onto products. Additionally, it features social login integrations with Google and Apple, ensuring a smooth and user-friendly authentication process. The platform also includes real-time refund processing and order tracking, which I developed to enhance the user experience. Notifications were integrated using Firebase Cloud Messaging (FCM), ensuring real-time updates.

Admin:- It offers functionality for uploading products and artwork (printable images) while enabling admins to create and manage sub-admin accounts for streamlined delegation. The platform also supports refund processing and allows admins to promote users to artists, empowering them to contribute designs. Additional features include managing product categories, a "Contact Us" section for user inquiries, and more.

Project Name:- VaultPd

Technology:- ReactJs, Firebase, Antd, RTK Query

Description: In this project, I was responsible for managing the complete development of the admin panel and web application for a document store platform.

Web:- Designed and developed a secure document storage web application to enable users to safely store and manage their documents, similar to Google Drive. The platform supports purchasing additional storage through tiered pricing models. Key functionalities include document scanning for direct uploads, file uploads from the gallery, and capturing documents via the camera. Users can securely share documents with trusted contacts. Advanced security measures, such as two-factor authentication (2FA) and automatic logout after a user-defined interval, ensure robust data protection and privacy.

Admin:- The admin panel provides full platform management, including user access control, subscription plan configuration, onboarding content updates, and a feedback system for continuous improvement.

■ Dec 2021 - Aug 2022

Oodles Technologies Pvt Ltd, Gurugram Haryana

Assistant Developer

Project Name:- Calling WebApp

Technology:- ReactJs, MUI, Web Socket

Description: This Project is a real-time, socket-based calling application enabling seamless communication with group call features and enhanced user experience. I enabled multi-user functionality, allowing multiple participants to join and collaborate in a single call.

Project Name:- In Vitro Fertilization

Technology:- ReactJs, MUI, Redux

Description:- Developed and maintained a web-based platform designed to assist fertility clinics in managing IVF treatments. The platform streamlined patient onboarding, treatment planning, appointment scheduling, and real-time tracking of medical data.
